QUASAR P8EBQTY.

Contactless + Manual, Refrigerated

Hydration Station Combo

This surface mount hydration station combo features a completely contactless activation method. The bottle filler includes an electronic sensor for a contactless (touch free) activation and a 30 second shut off timer. The drinking fountain is activated via infrared sensor below the nose.

The Bottle Counter conveniently displays the number of times the unit has been used, encouraging the refill of sports bottles. Quasar bottle fillers shall have UVC-LED treatment at the point of dispense, which disinfects the water while it is being dispensed; Killing 99.99% of bacteria. UVC-LED also cycles on periodically to keep the dispense-point sanitized between dispenses.

Key Versafiller moulded components shall contain Freshield, which utilises a silver-based antimicrobial compound that reduces the growth of micro-organisms and mildew to protect the surfaces from discolouration, odours and degradation.
Suitable for public building, gymnasiums, sports complexes, hospitals, schools, and offices.
