ABOUT OASIS.

OASIS is a subsidiary of OASIS International. The OASIS brand is the recognized worldwide leader in the design and manufacturing of bottled and pressure water coolers.

We also provide mains-fed water coolers, filtration equipment, non-refrigerated drinking fountains and dehumidifiers. Our products are distributed to over 100 countries through our worldwide sales and warehousing network. Timely delivery is critical to our customers and of paramount importance to us.

OASIS is headquartered in Ballina, Ireland with an integrated manufacturing facility in Gliwice, Poland. Factory sales people and warehouses are based throughout Europe, Russia and the Middle East to serve our customers.

OASIS International corporate headquarters are located in Columbus, Ohio and the company also has a manufacturing facility in Monterrey, Mexico.

**Since 1910, we've
focused on only one
thing:**

**Delivering refreshing
water to the world.**

OASIS was founded in 1910 and from the very beginning, innovation is what characterized the company.

Mains-Fed Water Coolers are bottle-less systems that connect directly to your premises existing water mains. Combined with industries finest filtration systems, OASIS Mains-Fed Water Coolers provide healthy refreshing water.

- 1922: First mains-fed water cooler “bubbler”
- 1954: First Hot 'N Cold model is designed
- 1990: First mains-fed water cooler systems integrated with filters are marketed
- 2006: Kalix mains-fed water cooler model with PVDC system introduced
- 2010: Kalix mains-fed water cooler Carbo Co2oler with PVDC system introduced

Kalix with Green Filter system.

INDUSTRY.

OASIS' mains-fed water coolers cater to an endless variety of environment.

Predominantly in public and social areas that share high volume of users on a daily basis.

Corporate Campuses: Offices, gyms, canteens, etc.

Transportation Depots: Train Stations, Airports, Bus depots, etc.

Healthcare: Hospitals, GP offices, etc.

Education: Schools, Universities, canteens, etc.

This is where product demand and sanitisation risks are both at their peaks.

With this in mind, OASIS continually ensures that our products are the most hygienic and healthful. With the incorporation of advanced technology and by accomplishing design & engineering feats, means that ease of sanitisation has never been easier.

Our units are sustainable, with reliability you can count on - just like our continuous support system we provide before and after sales.

Over 100 years of high quality design and manufacturing.

TECHNOLOGY.

OASIS offer a wide range of mains-fed water coolers and operating technologies to satisfy different customer needs. There are two main technologies that are used:

- Direct Chill Cooling
- Reservoir Cooling

Direct Chill:

The Kalix range of mains-fed water coolers utilise Pressure Vessel Direct Chill (PVDC) cooling technology. The heart of the PVDC system is the two-piece cooling tank made from AISI Grade 304 stainless steel. This pressurized tank provides a volume of 1.5 litres of cold water (20 Litres per hour) available on demand. Benefits of the PVDC system include:

- Two piece tank can be opened for service / maintenance
- Tank is enclosed in two piece injection moulded EPS insulation to minimise thermal losses and maintain the water temperature within the tank
- The sealed tank design protects the water in the tank from contamination from external sources (e.g. air borne contaminants)

The CO₂ mixer tank

The CO₂ mixer tank is located inside the PVDC cooling tank which helps to maintain the cold water temperature of the carbonated water prior to dispense. The mixer tank has been moulded from FDA & CE approved plastics. As carbonated water is dispensed, the mixer tank is automatically refilled with cold water & CO₂ gas, ensuring that a continuous supply of carbonated water is available

Reservoir Coolers:

OASIS offers reservoir based mains-fed water coolers using both the iconic Removable Reservoir cooling system and traditional fixed stainless steel reservoirs.

REMOVABLE RESERVOIR:

- Modular-design
- Easy to disassemble
- Long lasting materials
- Minimizes spare parts
- Value for money
- New OASIS repair and refurbishment service
- Optional two-piece hot tank

Fixed Stainless Steel Reservoir:

- Entry level product offering excellent cooling performance at the most cost effective price point

Dual-Float:

- All OASIS reservoir coolers use a dual-float system to control the water flow into the reservoir. The primary float will close, shutting off the water supply to the reservoir, as the water level inside the reservoir rises. When water is dispensed from the cooler, the primary float will open, allowing the reservoir to refill.
- If the primary float should fail to shut off the water supply for any reason, then as the water level continues to rise, the back up float will actuate and shut off the water supply. The additional security of the back up float minimises the risk of water leaks.

OASIS AQUILA

FEATURES

- Contactless, infrared sensor activation
- User friendly interface
- LED back-lit buttons
- Large alcove for refilling sports bottles & carafes
- Single dispense point
- Front door panel allows for easy access to filters
- Pressure Vessel Direct Chill technology
- Two-step Safety operation for hot water
- Quasar UVC-LED optional

OASIS Aquila is the next generation of mains-fed water coolers. This fully contactless unit is the trifecta: Designed for performance, maintenance and aesthetics, the OASIS Aquila has it all.

With a contactless activation, hydrating is a safer experience than ever! The user interface is intuitive and responsive. OASIS Aquila's tall dispense height means you can easily fill that large sports bottle!

Designed for effortless servicing and sanitisation, the front door panel allows for easy access to filters.

OASIS Pressure Vessel Direct Chill Point technology provides a consistent delivery of chilled water; as the water enters the system, it passes into a pressure vessel and is chilled as it moves through to the point of dispense.

The unit's exterior is made of ABS plastic and matt black powder coated steel side panels. The interface has a contrasting high gloss finish - this gives the OASIS Aquila a timeless, elegant appearance

Available with Quasar, the industry's only true point-of-dispense UVC LED. Killing 99.99% of bacteria and pathogens instantly

OASIS DANU

CODES

- Hot+Cold:
BXM1CRSHSY

FEATURES

- Contactless, infrared sensor activation
- Convertible: Can be used as either a mains-fed water cooler or bottom-load bottled water cooler
- The industry's first contactless bottle watercooler
- User friendly interface
- LED back-lit interface
- Large alcove for filling sports bottles & carafes; with open sides for greater accessibility
- Single dispense point
- Front door panel allows for easy access to filters or water bottle
- Two-step Safety operation for hot water
- Easy to clean exterior (ABS)

OASIS Danu is the next generation of convertible watercoolers. Choose to have your water come from a bottle or directly from the mains supply. This fully contactless unit provides refreshing water with such greater accessibility than ever before.

Purposefully designed with convenience in mind. Fill large sports bottles or small glasses. A large dispense height and an open sided alcove means there are no barriers to get hydrated.

This matt black unit with a glossy interface and alcove gives OASIS Danu a timeless, elegant appearance.

Available in Hot and Cold only.

KALIX

FEATURES

- Push button water dispensing
- Safety lock hot button
- Optional Mechanical Autodrain
- Optional factory installed green filter system
- Integrated cup dispenser (CD Models only)
- Large alcove for refilling sports bottles & carafes
- Pressure Vessel Direct Chill technology
- CO₂ concentration levels similar to branded bottled sparkling water (Carbo models only)

OASIS's Kalix presents itself with features that all great coolers possess; from simple design, ease of use, and maintenance, to a refreshing cup of water.

Designed for effortless servicing and sanitisation, the front door panel allows for easy access to filters.

OASIS Direct Chill mains-fed water coolers offer significant hygiene benefits. As the water enters the system, it passes into a pressure vessel and is chilled as it moves through the vessel to the point of dispense. This provides a consistent delivery of chilled water as the water does not come into contact with air until it is dispensed.

A proud addition to the Kalix range is the Kalix CO₂ models; offering CO₂ concentration levels of 5.2 – 5.6 g/l that are similar to leading branded bottled sparkling water. Combining carbonation technology with the Kalix PVDC cooling system, the Kalix CO₂ provides the most refreshing and sparkling water on the market!

Unique to Kalix is our Kalix Mechanical Autodrain to help prevent overflowing drip trays.

Some models available with Foot Switch Retrofit for hands-free activation.
Some models available with Infrared Sensors for a contactless activation.

KALIX CONTACTLESS

FEATURES

- Front door panel allows for easy access to filters
- Pressure Vessel Direct Chill technology
- Integrated cup dispenser
- Large alcove for refilling sports bottles & carafes
- Pressure Vessel Direct Chill technology
- CO2 concentration levels similar to branded sparkling water (Carbo models only)
- Optional factory installed Green Filter system
- Optional mechanical Autodrain (Non-CO₂ models only)
- Available in:
 - Ambient & Cold, Hot & Cold, Tri-Temp, Cold & CO₂, Ambient, Cold & CO₂

OASIS' classic KALIX has become fully CONTACTLESS.

Kalix Contactless uses advanced infrared sensors for an accessible gesture-based activation which also eliminates any concerns of cross-contamination from pathogens and viruses. This new technology provides all users with quick and easy water from a safe source.

Kalix Contactless provides two types of water temperature options. Ambient and cold or hot* and cold water options are available.

The Aquabar II is the OASIS heavy duty reservoir mains-fed water cooler.

This ABS injection moulded & removable metal side panel cooler, boasts of its 15 litre stainless steel fixed reservoir with external refrigerant coil and 1.5 litre stainless steel hot tank.

Delivering the freshest of water in 3 temperatures: hot, ambient, and cold.

MIRAGE 2

FEATURES

- Dual Use - Bottle or Mains-fed operation
- Indicator lights for hot & cold systems

CODES

- Tritemp
MIR311DY
MIR301DY

COLOUR OPTIONS

- Black and stainless steel
- White and black and stainless steel

The Mirage 2 is the stylish addition to any contemporary kitchen or break room.

This unit can be easily converted from bottled to mains-fed operation.

This flexible water dispenser provides hot, ambient, and cold water on demand from either source.

FEATURES

- REMOVABLE RESERVOIR
- Inside-Out cooling probe
- Efficient and proven technology
- High quality = longevity
- Great quality-performance-price ratio
- Range of hot tanks available

The Quartz's sleek, stainless steel body with contrasting ABS injection moulded trims creates a sophisticated modern aesthetic

With its innovative cabinet design, hot tank replacement can be accomplished in just 4 minutes.

The 'inside-out' cooling probe design used throughout the entire range of Removable Reservoir coolers ensures a more efficient cooling method, conserving energy and eliminating condensation within the cooler.

The self supporting cooler chassis can be quickly and easily removed from the cabinet to simplify the maintenance and servicing process. The removable reservoir system simplifies the sanitization process - just replace the water contact parts with pre-sanitized components. Requires no replacement of disposable parts or use of messy chemicals at your customer site.

The service-friendly water cooler, Quartz, improves the access to the quick connect hot tank and other internal parts, replacing the Hot Tank now takes only 4 minutes compared to 10 minutes for our traditional RR models. A service technician can now work on a cooler without removing the chassis from the cabinet, also avoiding any possible accidental wire disconnection. To service the cooler, only one screw needs to be removed.

- Hot+Cold:
POU1CCTHSY

COLOUR OPTIONS

- Dark Grey & Stainless Steel

The sophisticated and clean line design of the Onyx Mains-fed is ideal for the home countertop, acting as a haven for guests and home owners alike.

A blue LED spotlight illuminates the dispensing area as the water is being released. At the bottom sits a removable drip tray, making home maintenance a simple task.

The compact unit that is Onyx Mains-fed is renowned for its appearance within the home and its refreshing water.

POLARIS

Countertop

FEATURES

- Hot, Cold and Room Temp from a single dispense point
- Polymer cabinet won't rust or scratch countertop
- Mains-fed counter-top can connect to a filtration or RO system
- Two options for dispensing; choose from 3 pre-select cup sizes or any size dispense
- Less than 43cm tall so that it will fit under kitchen cabinets
- Unparalleled dispense height of 27.5cm makes it easy to fill large sport bottles
- Commercial cooling capacity; compressor-driven refrigeration system
- Removable drip tray

The Polaris is a compact and stylish mains-fed water cooler that sits on your countertop, providing: chilled, hot and ambient water at the touch of the button, all from a single dispense point.

The Polaris is a stylish and durable solution to your home, with scratch resistant properties.

The convenience of this unit is unparalleled; with its tall dispense height, you can top up your glass, or fill that large sports bottle for when you're on the go.

Ideal for home offices, or if you've a busy household.

Foot Switch Retrofit Kit for Kalix

FEATURES

- Compatible with OASIS Kalix only

MODELS

- Single Kit: Cold Water only
- Dual Kit: Cook & Cold water
- Dual Kit: Hot & Cold water

Retrofit your Kalix with a hand-free interface solution, reducing the risk of potential cross-contamination.

This retrofit foot operated solution for your water cooler is ideal for locations with high volume of users.

Along with the foot pedal switch, this kit includes a blanking plate to cover the push buttons and labels to signal to the user that this is a foot activated unit.

A close-up photograph of several green leaves, likely from a plant like a corn or similar, covered in numerous small, glistening water droplets. The leaves are arranged diagonally across the frame, and the lighting creates bright highlights on the droplets and the leaf surfaces. The overall color palette is various shades of green, from light to dark, with the white of the text box providing a sharp contrast.

WHY OASIS... ■■■

There are many reasons to choose OASIS as your solution to your air or water dilemma.

Here are just a few:

- Our products are Industry leading
- We are reliable
- Our designs are ethical
- Variety of products
- Economical
- Our team can aid you with their specialist knowledge, technical support and advice
- Our flexible and friendly approach
- We can create bespoke units; tailored to your needs

INSTALLATION KIT.

OASIS MAINS-FED COOLER INSTALLATION KIT
Compression Fitting Version
034653-003

- This kit is an 'all in one rail', which when properly installed will regulate the feed water used to supply a water dispensing device.
- The kit includes an isolation valve with double non return, a pressure limiting valve set at 3 bar and a water block, which will stop the water flow if a pre set volume has been exceeded. The inlet of the kit is 15mm compression and the outlet is ¼" push fit.
- This kit should only be fitted to a mains cold water supply / boosted mains, not a tank fed supply.
- The kit features twin 'type approved' non return valves and thereby complies with the current WRAS / EPDWA regulations for supplying coolers and carbonators.
- *For further details consult your supplier.*

Installation Procedure

The feed water kit should be fitted to a suitable 15mm mains cold water pipe made of copper. Alternative kits are available for plastic pipe work, please consult your supplier. The pipe work should be clean, free from bends / dents and should not be painted. The kit should be mounted vertically and in a position to allow for the access to individual components, for altering the settings.

Altering The Settings

To alter the maximum feed water pressure, turn the slot on top of the chrome pressure limiting valve either clock / anti – clockwise.

To alter the maximum volume of water to be discharged in any given instance, firstly remove the ¾" x ¼" adaptor from the outlet of the grey water block device. Inside the outlet there is a pointer that can be aligned with one of the figures around the circumference. Each figure equates to 1 gallon. A standard kit is set on 2 (i.e. 9 litres). The maximum setting is approximately 50 litres.
