

Fan Motor Change - Dehumidifiers.

TECHNICAL BULLETIN

OAS0046A

OASIS has been using fan motors from Morrill Motors since 1994. Morrill have recently transferred production from North America to China.

In order to improve logistics and supply, OASIS has changed supplier to EBM Papst who is one of the major worldwide manufacturers of fan blades and motors.

Introduction of EBM Papst parts into production began with the following serial numbers:

Model Type	Serial Number
D75	1328P
D125, DHG220	1328P
D165, DHG270, DHGIP54	1327P40862

OASIS has developed a service kit that contains all of the necessary parts to install EBM Papst fan blades and motors into dehumidifiers currently in the field. Kit part numbers are as follows:

Model Type	Kit Number
D75	037723P002
D125, DHG220	037723P002
D165, DHG270, DHGIP54	037723P003

Please note each kit contains full instructions on how to replace the blade and motor.

All CE test reports have been updated to include these new electrical components.
