

Currently ceramic filters supplied by OASIS as part of the Green Filter program have been delivered with the filter mount glued to the filter element. For this reason, customers needed to order particular filters for EZ-Turn or EZ-Clip applications.

OASIS have now developed a new universal ceramic filter that may be used with both EZ-Turn and EZ-Clip systems - the new ceramic filter will attach to the Green Filter filter mount in exactly the same way as carbon filter elements.

Customers should now order universal ceramic elements for replacement purposes under the part number **036463-102**

		
Original Filter		Universal Filter
EZ -Turn 037068P101	EZ-Clip 037068P103	036463-102

Note that if you are purchasing universal ceramic filters to replace the original ceramic filter (i.e. one with mount glued into position), you will need to purchase a replacement mount as well. Part numbers for the mounts are as follows:

EZ-Clip	037056A001	
EZ-Turn	037062A001
