VERSAFILLER P8EBFSLTMY.

Contactless + Manual, Split-Level, Refrigerated

Hydration Station Combo

This surface mount hydration station combo has two activation methods. The bottle filler includes an electronic sensor for a contactless (touch free) activation and a 30 second shut off timer. The drinking fountains have both contactless activation via s sensor, while the other is activated via one of four push-pads.

Key Versafiller moulded components shall contain Freshield, which utilises a silver-based antimicrobial compound that reduces the growth of micro-organisms and mildew to protect the surfaces from discolouration, odours and degradation.

Suitable for public building, gymnasiums, sports complexes, hospitals, schools, and offices.
