VERSAFILLER P8EBFSLTTY ■ Contactless, Refrigerated, Split-Level
 Hydration Station Combo

This surface mount hydration station combo features a completely contactless activation method. The bottle filler includes an electronic sensor for a contactless (touch free) activation and a 30 second shut off timer. The drinking fountains are activated via infrared sensors below the nose.

The Bottle Counter conveniently displays the number of times the unit has been used, encouraging the refill of sports bottles.

Key Versafiller moulded components shall contain Freshield, which utilises a silver-based antimicrobial compound that reduces the growth of micro-organisms and mildew to protect the surfaces from discolouration, odours and degradation.

Suitable for public building, gymnasiums, sports complexes, hospitals, schools, and offices.
