

OASIS Danu

Convertible: Mains-Fed / Bottled Water Cooler

OASIS Danu is the next generation of mains-fed water coolers - This fully contactless unit provides refreshing water with such greater accessibility than ever before. Choose to have your water come from a bottle or directly from the mains supply.

Purposefully designed with convenience in mind. Fill large sports bottles or a small glasses. A large dispense height and an open sided alcove means there are no barriers to get hydrated.

This matt black unit with a glossy interface gives OASIS Danu a timeless, elegant appearance.

Available in Hot and Cold only.
