

QUASAR CONVERSION KIT PN8EBQY ■ Contactless, Refrigerated Cooler to Bottle Filler

Replace your existing drinking fountain and abandon the bubbler! Quasar PN8EBQY used the same rough-in opening, piping and electrical system already in place – making this retrofit quick and easy!

Quasar PN8EBQY is a surface mount unit that delivers chilled drinking water. This refrigerated bottle filler is perfect for those high traffic areas. With a contactless, touch-free activation – there are no fears of cross-contamination.

The Bottle Counter conveniently displays the number of times the unit has been used, encouraging the refill of sports bottles.

Quasar bottle fillers shall have UVC-LED treatment at the point of dispense, which disinfects the water while it is being dispensed; Killing 99.99% of bacteria. UVC-LED also cycles on periodically to keep the dispense-point sanitized between dispenses.

Key Quasar bottle filler moulded components shall contain Freshield, which utilises a silver-based antimicrobial compound that reduces the growth of micro-organisms and mildew to protect the surfaces from discolouration, odours and degradation.
