

OASIS AQUILA

Mains-Fed Water Cooler

OASIS Aquila is the next generation of mainsfed water coolers.

The Aquila's tall dispense height means you can easily fill that large sports bottle! With a simple press of a button, you can enjoy hydration instantly. The OASIS Aquila ensures every sip is refreshing and tailored to your taste.

Designed for effortless servicing and sanitisation, the front door allows for easy access to filters. OASIS Pressure Vessel Direct Chill Point technology provides a consistent delivery of chilled water; as the water enters the system, it passes into a pressure vessel and is chilled as it moves through to the point of dispense.

The unit's exterior is made of ABS plastic and painted steel which are easy to clean.
